

XCIENT

NEW THINKING. NEW POSSIBILITIES.

People's expectation toward individual mobility requires more than just a convenient means of transportation. The old understanding of cars has become outdated. A car represents individuals' lifestyles, and it became an integral part of their lives. At the same time, the automobile industry has experienced seismic change. Hyundai Motor Company has grown rapidly to become one of the largest automakers, backed by world class production capability and superior quality. We have now reached a point where we need a qualitative approach to bring bigger ideas and relevant solutions to our customers. This is an opportunity to move forward and we have developed a new brand slogan that encapsulates our willingness to take a big leap. Led by our new slogan and the new thinking underlying it, we will become a company that keeps challenging itself to unlock new possibilities for people and the planet.

The most advanced evolution and innovation is presented

XCIENT, the novelty towards the unknown world

The completion of the advanced style

XCIENT cab with higher full height (+225mm) and longer full length (+175mm)
 With the availability of more space, experience more comfort and freedom as you drive.

Cabin Variant

Standard Roof		High Roof	Low Roof
Day Cab		Sleeper Cab	
D	S	H	L

D : Day cab / S : Standard cab / H : High roof / L : Low roof

Cabin Space Comparison

Cabin	CURRENT (EG)	XCIENT(QZ)	
		Compared with EG	
Length	2,165	+175	2,340
Width	2,495	-5	2,490
Height	STD	+225	3,230
	High	-	+645
Internal Height	STD	+390	1,490
	High	-	+795
Engine tunnel	395	-205	190
Bed Size	650	+150	800

Unit : mm

Wider space for a more comfortable driving experience
 Its optimum space allows for freer indoor movement and activity.

Tractor : S / H
 Cargo : S
 Dump : D / S / L
 Mixer : S / L

※ Day cab for various upper body
 ※ Low roof option for unique upper body (picture)
 ※ Day cab + Low roof not available

Innovative design

Adopting the aerodynamic style that hasn't been implemented in conventional models, the XCIENT is innovatively designed with the inclination of the windshield, expansion of the front volume, and application of dynamic character lines.

Simple and chic in style

XCIENT integrated the color of side-view mirrors, roof visor, side garnish, mud guard, and other components like that of an existing luxury sedan so as to present a sophisticated sense of identity.

1. Application of corner vane to reduce side contamination
2. Low-drag European mirror
3. Corner vane integrated large front grill and wide bumper
4. Roof visor and roof spoiler with height adjustment

Outside mirrors
For improved visibility, the presence of blind spot is reduced by enlarging the outside mirror and through the design/utilization of aerodynamic mirror, noise as well as water hold-up phenomenon on the side glass is reduced.

The second evolution of *XCIENT*

Largest in its class in terms of **storage space**

Stay worry-free as it takes care of your storage needs wherever you go.

1. Cup holder

2. Cooler and warmer
(World first refrigerant and electric coil method)

3. Overhead console (150 liters)

4. Rear overhead console
(high roof : 320 liters)

Lower crash pad console (16 liters)

Lower bed console (120 liters)

The second evolution of **XCIENT**

The comfort presented by
the world's largest bed

The thoughtful consideration to soothe driver's fatigue after long-hours of driving is reflected in the maximized size of the sheet.

Bed 2nd Floor (high roof only)
2nd floor bed for high roof cabin

Sleeper Cabin Bed (option)
World best class bed size

The second evolution of **XCIENT**

The smart driving space presented only by XCIENT

A total of about 100 functions including a crash pad with optimally arranged hand-reach switches, audio, multi-display, Bluetooth, hands-free system, cruise switch add comfort to your driving.

1. Multi Display (black color)

Driving information, fault diagnosis, axle weight (air sus.) and etc

2. Q800

(Radio + USB + Aux. + CD + i-pod + Bluetooth)

Passenger Seat (Convenience focused seats)

- Belt-in-seat
- Air suspension (option)
- Folding seat (option)

Backward folding
- Console function

Forward folding
- Seat cushion

New profile seat (Ergonomic new profile seat)

- Cold / warm air ventilation
- Leather covering
- Belt-in-seat
- Seat operating on the bed
- Air suspension (Multi function seat)

The second evolution of *XCIENT*

Experience the truck of the future

ABS with ASR (Anti-Slip Regulator)

This ABS (Anti-Locking Brake System) brings the vehicle to a safe, controlled stop and is particularly advantageous whilst driving under slippery road conditions. The driver can apply maximum pressure on the brake pedal without worrying about wheel lock, skidding and subsequent loss of control. With ABS/ASR, the driver can maintain full directional stability of the vehicle at all times and avoid potentially dangerous situations.

Ergonomic switch operation

Power Window System - Easy window switch control

The third evolution of **XCIENT**

The essence of **high technology**

XCIENT expresses a sense of sophistication both internally and externally as it features metallic pad, new trim colors and pattern, and soft mood light using an LED lamp, an approach that is hardly imagined in other trucks.

Indoor room lamps

head lamp

The third evolution of **XCIENT**

World-class comfort when getting on and off the vehicle

World-class comfort when getting on and off the vehicle is presented through the 105mm lowered stair-type steps, which are the widest in its class.

1. Grip for getting on and off the vehicle

2. Inclined steps with the largest cross-sectional area in its class

The third evolution of **XCIENT**

Comfort by being away even from fine vibration

As the first in Korea to use front-wheel air-suspension, XCIENT provides the best riding comfort by lowering the vehicle's vibration frequency from 1.9Hz to 1.1Hz.

Retarder (Option)

This retarder system not only reduces the maintenance cost of a vehicle but also drastically improves driving safety and brake performance by increasing the life of the brake lining by four times.

Automatic (ECAS) 4-bag type air-suspension

Cab air-floating suspension

Test under 40° below zero in the Arctic (4x2 Tractor)

The fourth evolution of **XCIENT**

Extreme low-temperature testing has been completed

To apply powerful durability as much as possible, Hyundai Xcient has completed extreme low-temperature tests about various driving and durability successfully, and has proved that it is the best truck in the world with strong power and durability as a result.

Driving test at Ivalo, the northmost place in Finland

Improved fuel efficiency Further improvement of profit

With its 7% improved fuel efficiency, XCIENT is guaranteed for maximum practicability and efficiency.

Powertec Engine

D6CC41 (Euro4)
Max. Power : 410ps
Max. Torque : 188kg·m
Displacement : 12.920cc

D6CC3H (Euro4)
Max. Power : 380ps
Max. Torque : 160kg·m
Displacement : 12.920cc

D6CB41 (Euro3)
Max. Power : 410ps
Max. Torque : 188kg·m
Displacement : 12.920cc

D6CA41 (Euro2)
Max. Power : 410ps
Max. Torque : 188kg·m
Displacement : 12.920cc

H Engine

D6HB3H (Euro3)
Max. Power : 380ps
Max. Torque : 173kg·m
Displacement : 9,960cc

D6HB38 (Euro3)
Max. Power : 380ps
Max. Torque : 160kg·m
Displacement : 9,960cc

Q Engine

D6AC (Euro1)
Max. Power : 340ps
Max. Torque : 140kg·m
Displacement : 11,149cc

The reliable and trustworthy **durability**

XCIENT maintains structural durability under any road condition due to its robust design that extensively applied structured cab and high-tensile steel.

Air cleaner

Front frame & High-tensile chassis
The roll forming method was applied to the high-tensile frame and by increasing the length between frames up to 60mm, it ensures driving comfort as well as excellent vehicle handling performance.

Reduces in half the time needed for maintenance **Largest maintenance panel in its class**

Cab tilting

Along with the extensively increased cab tilting angle up to 61°, the volume of the cab tilting cylinder was enlarged. Also, it allows for ease of maintenance by preventing oil leakage with the use of a protection cover on the top part while securing the volume of the tilting pump reservoir.

Bumper-integrated front folding steps

For easier maintenance of more parts compared to the previously applied maintenance panel opening at the front, the broad width folding steps are newly designed.

Quality in Every Detail

Steering wheel (Including pneumatic tilt and telescopic function)

Roll-screen type sun visor (Front: Automatic, Side: Manual)

Overhead console

Rear overhead console (High roof)

Back panel console and bedside console

Bedroom lamp

Air-conditioner (Remote controllable)

Sun-Roof

T.G.S knob

New profile sheet (Driver's seat)

Room lamp

Lower crash pad compartment

Lower bed console

Ion generator (Odor removal and sterilization)

Table at the passenger seat (3-step expandable type)

Pull-down door glass (Application of water-repellent door glass)

External compartment (1,500mm of lowest accessibility on the same level)
